

Task 16 – Simple Profit Analysis

Dataset: SampleSuperstore

Objective: Compare total profit across product categories and summarize the results using Excel calculations and a chart.

1. Work Completed

- Created a category-wise Total Profit summary.
- Calculated Average Profit for each product category.
- Created a column chart for Total Profit by Product Category.
- Added Product Category and Total Profit axis titles.
- Prepared key findings from the analysis.

2. Excel Formulas Used

Total Profit: =SUMIF(\$H:\$H,O2,\$M:\$M)

Average Profit: =AVERAGEIF(\$H:\$H,O2,\$M:\$M)

3. Profit Summary

Category	Total Profit	Average Profit
Furniture	18,451.27	8.70
Office Supplies	122,490.80	20.33
Technology	145,454.95	78.75

4. Key Findings

- Technology had the highest total profit.
- Office Supplies had the second-highest total profit.
- Furniture had the lowest total profit.
- Technology had the highest average profit.
- Profit varies across the three product categories.

5. Conclusion

The analysis compares category-wise profitability using Excel. The summary table and column chart make differences in total and average profit across categories easy to understand.
